

1 Interaction of oXygen with Other Components

The oXygen XML Editor interacts with many TextGridLab components in a way similar to that of the [XML Editor](#). By using the [context menu of the oXygen XML Editor](#), the [Lemmatizer](#), and the publish tool [SADE](#), if installed, can be used. In contrast to the TextGrid XML Editor, the [Dictionary Search](#), [LEXUS](#), [Cosmas II](#) and [ANNEX](#) cannot be used with the oXygen XML Editor.
