

1 Toolbar of the Text Image Link Editor Perspective

If the [Image View](#) is activated, additional elements in the toolbar are usable:

- Click  to delete active selections
- Click  to reset the Text Image Link Editor

If a file has also been opened in the [XML Editor](#), more buttons in the toolbar will be activated:

-  links a selected text segment to a selected shape
-  unlinks selected link(s)
-  (next to the linking icons) saves the Text Image Link Object
-  saves the Text Image Link Object as...
-  saves the Text Image Link Object as new [Revision](#)
