

# 1 Configuration of the plug-in

To use the plugin, an end point in the form of a URL must be specified, which leads to an already started SADE server. Therefore you can select the item "Sade Publisher" that appears at your [user preferences](#).

In case of local installation on your PC, the URL is: <http://localhost:8080/exist/apps/textgrid-connect/publish/textgrid/>

As an "Authorized User" you enter "admin" and the password field can be left blank in the default configuration.
